Product Description

OEM 304 Mirror Finish Stainless Steel Sheet HL 3mm - 60mm 12mm - 300mm

304 is a versatile stainless steel widely used in the production of equipment and components that require good comprehensive performance (corrosion resistance and formability). In order to maintain the inherent corrosion resistance of stainless steel, steel must contain more than 18% chromium and more than 8% nickel. 304 stainless steel is a grade of stainless steel produced according to the American ASTM standard.
